Atty. Docket No.: IPHD.P007   *Serial No. 09/677,954*

IN THE CLAIMS:

Please amend the claims as indicated below.

1   Claims 1-47   (Cancelled)

1   48.   (New) A method for real time mobile commerce transactions comprising:

2   receiving a selected transaction request transmitted from a mobile device to a

3   central server, wherein the selected transaction request comprises an information search

4   request, an information acquisition request, an information comparison request, a price

5   request, a price comparison request, a transaction instruction request, and a transaction

6   execution request, and wherein transmitting the selected transaction request comprises,

7   transmitting using a keyboard, transmitting using audible speech, and transmitting visual

8   data, comprising data in a touch screen enabled display panel format;

9   querying at least one server regarding the selected transaction request in response

10   to receiving the selected transaction request;

11   receiving a response to the query from the at least one server;

12   processing the received response, including formatting the received response;

13   transmitting the processed response to the mobile device, such that the mobile

14   device receives the response in one of a plurality of formats comprising an audible data

15   format, and a visual data format including a touch screen enabled display panel format;

16   and

17   executing a transaction in response to a received transaction execution request,

18   including communicating with the at least one server using data received from the mobile

19   device.
